

Joanne Hartman Cody
Landscape Architect

Capability Statement

**Leader in accessible park planning
and practical solutions**

Company Description

With over 35 years of design experience with national park sites and more than 20 years of specializing in accessibility technical guidance and project review, we are ready to help your park be more accessible and welcoming to visitors with disabilities.

We work with parks to develop projects that can be accomplished with in-house staff and aid park staff in writing contracts for larger project needs. We also review park project statements to make them more competitive and review design and construction documents for compliance with accessibility laws. We can review your construction projects during construction and at completion for errors in construction that can be fixed prior to final acceptance of the work.

We are passionate about making our national park and forest sites and programs accessible and providing meaningful experiences for all visitors.
